

Monforte is a spatial partition element that produces a flexible composition of the different areas of work. This mobile and articulated wall can be freely arranged, composing different types of spaces: meeting rooms, lounges, waiting areas, training areas which can be easily reorganised according to the changing needs of the activities. This element guarantees privacy without isolation and is soundproof, a perfect quality to make open spaces more pleasant, intimate and relaxing. The patented structure is made up of a series of tubular elements upholstered in fabric independent and connected to each other by a modular chain. Stability is guaranteed by a foot inserted at the end of the tubular elements when needed.

## DIMENSIONS

- Tubes: Ø 104 mm - 4"
  - Standard freestanding version: H. 1900 mm - 75"
  - Medium freestanding version: H. 1600 mm - 63"
  - Low freestanding version: H. 1200 mm - 47"
  - Ceiling version: H. 2900 mm - 114"
- Anchored to the floor and ceiling for a maximum of H. 3000 mm - 118"

Foot for freestanding version

Ceiling version anchored with metal cylinder

Ceiling version anchored with Ultralight

\*Other measures available on request and project. An even number of tubes is mandatory. The freestanding versions have feet to guarantee stability. The number of feet and the need for fixing to the floor depends according to the number of tubes and the configuration and is analysed each time by the technical office.

## FINISHES

### chain and feet:

- White
- Anthracite

### fabric tubes\*:

- Kvadrat: Hero, Divina 3
- Gabriel: Soul

\*Other fabrics to be tested and subjected to IOC's technical approval

## CERTIFICATIONS

Chain: UL 49 – classe VO
